TECHNICAL SKILLS

Languages : Java , Javascript, SQL

Web Technologies : Html , CSS, React.js , Node.js , Express.js, Rest APIs

Database & Tools: MongoDB , Git , GitHub , AWS,

System & Platforms: Linux (RHEL) , VirtualBox

PROJECTS

❖ Linux System Administration Automation

Developed five shell scripts during RHCSA summer training to automate Linux System Administration tasks including User Management, directory backup, file permission handling, and basic system monitoring, implemented in a Red Hat Enterprise Linux (RHEL) environment using Bash scripting and VirtualBox.

❖ Online Course Management System - Role Based Educational Portal

Built a full-stack web application implementing JWT authentication and role-based access control to securely manage courses, track student enrollments, and generate system reports, developed using MongoDB, Express.js, React, and Node.js (MERN stack).

❖ Personal Finance Manager - Smart Expense Tracker

Built a personal finance management web application that enables users to record and monitor daily income and expenses, offering structured financial insights for effective budgeting and expense tracking using MongoDB, Express.js, React, and Node.js (MERN stack).
